

Memory Module Specification

ARES ARMOR LITE

DDR4 RGB MEMORY

SPECIFICATIONS

Module Type	288-Pin Unbuffered DIMM
Capacity	8GB / 16GB / 32GB
Frequency	3200MHz/3600 MHz
IC Configuration	1024*8 / 2048*8
Voltage	1.35v
Working Temperature	0°C ~85°C
UL Rating	94 V - 0

DESCRIPTION

ARES ARMOR Lite is a DDR4 RGB gaming memory based on FBGA components per module. Each module support XMP 2.0 and had tested to run at DDR4-3200/3600 at low latency timing at 1.35v. Each 288-Pin DIMM used gold contact fingers. The JEDEC standard electrical and mechanical specifications are as follows:

Module type	DDR4 288 Pin Non-ECC DIMM	
Frequency	3200	3600
Cas Latency	CL16-18-18-42	CL18-22-22-42
Capacity	8GB	8GB
	16GB	16GB
	32GB	32GB
Voltage	1.35v	1.35v
Warranty	5 Years	

FEATURES

- Shining with RGB light
- Overclocking with XMP 2.0
- Synchronization with main motherboards
- Compatible with Intel and AMD
- V-CUT and diamond design.

Note: The PnP feature offers a range of speed and timing options to support the widest variety of processors and chipsets. Your maximum speed will be determined by your BIOS.

XMP TIMING PARAMETERS

- XMP Profile: DDR4-3200 CL16-18-18 @1.35v
- XMP Profile: DDR4-3600 CL18-22-22 @1.35v
